

MOODLE Learning Course Outline

Module 1: Introduction to Moodle

Objective: Understand the basics of Moodle and its learning environment.

Topics:

- What is Moodle? Overview and key features
- Moodle roles: Admin, Teacher, Student, Manager
- Understanding the Moodle interface: Dashboard, Navigation, Blocks, and Menus
- Key Moodle terminology: Course, Activity, Resource, Module

Practical Exercise:

- Explore the Moodle interface as a student and teacher
- Identify and navigate to courses, activities, and grades

Module 2: Course Creation and Management

Objective: Learn to create and manage courses in Moodle.

Topics:

- Creating a new course: Course settings, description, format, and availability
- Enrolling users: Manual enrollment, self-enrollment, cohort enrollment
- Managing course sections and topics
- Setting course visibility and access restrictions

Practical Exercise:

- Create a sample course with 3 topics
- Add sections, set access restrictions, and enroll sample students

Module 3: Adding Content and Resources

Objective: Learn to add various content types to Moodle courses.

Topics:

- Adding resources: File, Page, URL, Book
- Organizing content within course sections
- Uploading and embedding videos and images

Practical Exercise:

- Add a PDF, video, and external link to a course section
- Organize content for a mini-lesson

Module 4: Moodle Activities and Interaction

Objective: Learn to use Moodle's interactive features for student engagement.

Topics:

- Forum: Creating and managing discussions
- Assignment: Creating and grading assignments
- Quiz: Creating quizzes, question types, and grading
- Workshop: Peer assessment and collaborative learning
- Choice, Lesson, and Survey activities

Practical Exercise:

- Create a quiz with multiple-choice and short-answer questions
- Set up a forum discussion and post a topic
- Create an assignment submission for students

Module 5: Grading and Feedback

Objective: Learn to track and manage student performance.

Topics:

- Understanding Moodle gradebook
- Creating grade categories and grade items
- Grading methods: Points, scales, letters
- Providing feedback on assignments and quizzes
- Generating reports: Activity completion, progress, and grades

Practical Exercise:

- Set up the gradebook for your sample course
- Grade assignments and quizzes
- Generate a student progress report
